

# HOT-AIR HEATED EMISSION LINE

**FLEXOTHERM** provides a sample line for emissions testing that prevents one of the recurring problems with testing of hot exhaust: the frequent melting and burning of standard sample lines from incoming high-temperatures. Designed to be used in conjunction with our Canister Heaters and standard sample lines, this product completes an effective testing system. Our Hot-Air Heated sample lines utilizes a stainless-steel core, and does not use vulnerable electrical or plastic components.

Standard Hot-Air Heated Line

## Standard Features:

- ◆ Air flow provides even heating over entire line
- ◆ User-replaceable stainless-steel core
- ◆ 'Swage' type ports

## Options:

- ◆ Customer specified temperature sensor
- ◆ Choice of sample tube diameters
- ◆ Four or Six foot standard lengths
- ◆ Silicone 'boots' for protection of line terminations

## Warranty:

We at **FLEXOTHERM** support our products with a Two-year (*limited*) warranty from date of shipment. This warranty includes:

- ◆ Quick turn-around time on repairs
- ◆ Phone support during the repair process
- ◆ Full coverage on repairs caused by any defects in workmanship
- ◆ On-site repairs whenever possible
